MOOD BOOK 24/25

ABOUT US

Dal 1971 Ceramiche Castelvetro si distingue nella creazione di piastrelle in ceramica, concentrando il suo impegno nell'estetica e nel design senza compromessi, sempre alla ricerca incessante della perfezione. La nostra azienda si contraddistingue per l'adozione di tecnologie all'avanguardia, con un'attenzione costante alle esigenze del consumatore, al fine di garantire piastrelle in gres porcellanato di altissima qualità. Ceramiche Castelvetro: l'eccellenza che abbraccia il futuro del design e della qualità.

Since 1971, Ceramiche Castelvetro has distinguished itself in the creation of ceramic tiles, focusing its efforts on uncompromising aesthetics and design, always striving for perfection. Our company is committed to adopting cutting-edge technology, with constant attention to consumer needs, guaranteeing porcelain stoneware tiles of the highest quality. Ceramiche Castelvetro: excellence that embraces the future of design and quality.

Depuis 1971, Ceramiche Castelvetro se démarque par ses carreaux en céramique témoignant de son engagement dans l'esthétique et dans un design sans compromis, sans cesse à la recherche de la perfection. Notre entreprise se distingue par ses technologies de pointe et par son orientation consommateur en répondant aux exigences avec des carreaux en grès cérame de très haute qualité. Ceramiche Castelvetro: l'excellence qui embrasse le futur du design et de la qualité.

Seit 1971 produziert Ceramiche Castelvetro keramische Fliesen, die mit einem Fokus auf ansprechende Gestaltung und kompromissloses Design das unaufhörliche Streben nach Perfektion zum Ausdruck bringen. Mit der Anwendung von wegweisenden Technologien und der kontinuierlichen Ausrichtung auf die Anforderungen des Verbrauchers bürgt unser Unternehmen für hochwertige Fliesen aus Feinsteinzeug. Ceramiche Castelvetro: Qualität trifft auf die Zukunft von Design und Funktionalität.

CREATIVE REAL PEOPLE

Ceramiche Castelvetro rappresenta una visione unica: delle cose, delle persone, dell'idea del lavoro. Siamo più di un semplice insieme di elementi. Persone, lavoro, passione, design e ricerca si fondono per creare la bellezza. Siamo un'azienda in costante evoluzione, formata da individui che lavorano per creare ambienti su misura per l'umanità, offrendo ai clienti l'esperienza e la professionalità del nostro team.

Ceramiche Castelvetro represents a unique vision of things, people, and the idea of work. We are more than just a set of elements. People, work, passion, design and research come together to create beauty. We are a constantly evolving company made up of individuals working to create environments tailored for people, offering customers our team's expertise and professionalism.

Ceramiche Castelvetro représente une vision unique: des objets, des personnes, de l'idée du travail. Nous sommes bien plus qu'un simple ensemble d'éléments. Personnes, travail, design et recherche s'unissent pour créer la beauté. Notre entreprise connaît une progression constante sur la base d'individus qui travaillent pour composer des lieux sur mesure pour l'humanité, en proposant à la clientèle l'expérience et le professionnalisme de notre équipe.

Ceramiche Castelvetro steht für eine einzigartige Vision: von Dingen, von Menschen und von Arbeit. Wir sind mehr als eine bloße Gesamtheit von einzelnen Elementen. Menschen, Arbeit, Leidenschaft, Design und Forschung treffen aufeinander und vereinen sich in der Erschaffung von Schönheit. Unser Unternehmen entwickelt sich ständig weiter und besteht aus Menschen, die für die Lebensräume von Menschen arbeiten. Wir bieten unseren Kunden die Erfahrung und Kompetenz eines professionellen Teams.

CREATIVE REAL DESIGN

Attraverso la continua ricerca di qualità, innovazioni tecnologiche e sviluppo estetico, siamo diventati un'icona del Made in Italy, simbolo di un'eccellenza consolidata nel tempo. La nostra precisione per ogni singolo dettaglio e cliente ci ha permesso di creare una visione esclusiva. Un'idea di prodotto che cattura il fascino del nostro mondo senza comprometterlo, esprimendo l'esperienza di ogni luogo sempre nel rispetto dell'ambiente.

Through continuous research into quality, technological innovations and aesthetic development, we have become a Made in Italy icon, a symbol of long-established excellence. Our meticulous attention to every single detail and customer has allowed us to create an exclusive vision. A product idea that captures the charm of our world without compromising it, expressing the experience of every place while respecting the environment.

En exerçant une recherche continue sur la qualité, les innovations technologiques et le développement esthétique, nous sommes devenus les numéros un du Made in Italy, symbole d'une excellence consolidée au cours du temps. Notre précision envers chaque détail et client nous a permis de générer une vision exclusive. Une idée de produit qui fige le charme de notre monde sans le compromettre, en exprimant l'expérience de chaque lieu sans cesse dans le respect de l'environnement.

Dank dem ständigen Streben nach Qualität, technologischer Innovation und Designentwicklung sind wir zu einer Ikone des Made in Italy geworden, das für Bestleistungen renommiert ist. Wir achten auf das kleinste Detail und schenken dem Kunden Gehör: so konnte eine exklusive Vision entstehen. Eine Produktidee, die den Reiz unserer Welt unverfälscht einfängt und das Erlebnis jedes Ortes stets umweltgerecht zum Ausdruck bringt.

CREATIVE REAL FUTURE

I nostri concetti esclusivi di ricerca, la selezione scrupolosa delle materie prime, l'impiego di attrezzature altamente tecnologiche e l'innovazione nei sistemi applicativi hanno generato una svolta nella storia della ceramica. Con il gres di Ceramiche Castelvetro offriamo soluzioni d'arredo per ambienti interni ed esterni, perfette per trasformare la casa in un'oasi da ammirare e vivere pienamente.

Our exclusive research concepts, careful selection of raw materials, use of high-tech equipment and innovation in application systems have marked a turning point in the history of ceramics. With Ceramiche Castelvetro stoneware, we offer interior and exterior furnishing solutions that are perfect for transforming the home into an oasis to admire and experience to the full.

Nos concepts exclusifs de recherche, la sélection scrupuleuse des matières premières, le recours à des outils hyper technologiques et l'innovation des systèmes d'application ont bouleversé l'histoire de la céramique. Avec son grès, Ceramiche Castelvetro propose des solutions déco pour intérieur et extérieur, parfaites pour transformer la maison en oasis à admirer et à vivre pleinement.

Unsere exklusiven Entwicklungskonzepte, die sorgfältige Auswahl der Rohstoffe, der Einsatz von hochmodernen Technologien und die Innovationen in den Anwendungssystemen haben eine Wende in der Fliesenbranche herbeigeführt. Mit dem Feinsteinzeug von Ceramiche Castelvetro bieten wir Gestaltungslösungen für Innen- und Außenbereiche, die das Zuhause in eine Oase verwandelt, die das Auge erfreut und den Alltag verschönt.

CREATIVE REAL GREEN

La nostra missione è di dare piena espressione alle nuove esigenze ceramiche nel totale rispetto dell'ambiente circostante. Ceramiche Castelvetro ha avviato questo impegno anni fa, adottando un sistema produttivo altamente ecocompatibile. Abbiamo implementato progetti innovativi per il recupero di energia e acqua durante il processo di essiccazione ceramica, ottenendo riconoscimenti nel campo dello sviluppo sostenibile. Abbiamo recentemente raggiunto un'altra importante tappa con l'installazione di un grande forno ecologico, creando un ciclo chiuso di recupero totale che riduce significativamente le emissioni in atmosfera e i consumi di risorse.

Our mission is to embrace new ceramic requirements that fully respect the surrounding environment. Ceramiche Castelvetro started this commitment years ago, adopting a highly environmentally friendly production system. We implemented innovative projects for the recovery of energy and water during the ceramic drying process, gaining recognition for sustainable development. We recently reached another important milestone with the installation of a large environmentally friendly kiln, creating a closed total recovery cycle that significantly reduces atmospheric emissions and resource consumption.

Notre mission est de formuler des solutions pour répondre aux nouvelles exigences céramiques dans le respect total du milieu environnant. L'entreprise Ceramiche Castelvetro s'est engagée en ce sens depuis plusieurs années en adoptant un système de production des plus écocompatibles. Nous avons donné le coup d'envoi de projets novateurs pour la récupération de l'énergie et de l'eau pendant le séchage céramique, en obtenant des récompenses dans le domaine du développement durable. Nous avons récemment franchi un autre cap important en installant un grand four écologique qui génère un cycle fermé de récupération totale, en mesure de réduire significativement les émissions dans l'atmosphère et les consommations de ressources.

Unsere Mission ist es, die neuen Anforderungen an die Fliesenbranche vollkommen umweltgerecht zu erfüllen. Mit der Implementierung eines hochgradig umweltfreundlichen Produktionssystems engagiert sich Ceramiche Castelvetro schon seit Jahren für dieses Ziel. Wir haben innovative Projekte für die Energie- und Wasserrückgewinnung im Trocknungsprozess umgesetzt und etliche Anerkennungen in puncto nachhaltige Entwicklung erhalten. Jüngst setzten wir mit der Inbetriebnahme eines großen umweltfreundlichen Brennofens einen weiteren Meilenstein, dank dem wir die Kreislaufwirtschaft durch hundertprozentige Wiederverwendung verwirklichen und die Emissionen in die Atmosphäre und den Verbrauch von Ressourcen erheblich verringern.

VARIAZIONE DELLE SFUMATURE DI COLORE:
la sfumatura o sfumature nelle piastrelle variano da pezzo a pezzo e da produzione a produzione. Quando possibile è consigliabile controllare che pezzi provenienti da una singola produzione abbiano variazioni di sfumatura accettabili. Qualsiasi domanda o dubbio sulla scelta delle mattonelle dovrebbe essere chiarita prima della posa.

COLOR SHADE VARIATIONS:
The color shade of every tile varies from piece to piece and from each production. At least several pieces from the same production should be reviewed whenever possible in order to determine acceptable color shade variations. Any questions or concerns about your tile selection should be clarified before fixing.

VARIATION DES NUANCES DE COULEUR:
Le denuancage ou les denuancages des carreaux varient d'une pièce à l'autre et d'une production à l'autre. Lorsqu'il est possible, il est conseillé de contrôler que des pièces provenant d'une même production aient des différences de nuances acceptables. Toute demande ou doute concernant le choix des carreaux devrait être formulé et résolu avant la pose.

VARIATION DER FARBNUANCEN:
Die Nuance oder Nuancen der Fliesen ändern sich von Stück zu Stück und von Produktion zu Produktion. Sofern möglich ist es ratsam zu kontrollieren, dass Teile, die aus einer einzigen Produktion kommen, annehmbare Variationen der Nuancen aufweisen. Alle Fragen oder Zweifel über die Wahl der Fliesen sollten vor der Verlegung geklärt werden.

EN 14411 annex G Bia UGL - Gres a impasto colorato

EN 14411 annex G Bia GL - Gres smaltato

UNI EN ISO 10545.6

In riferimento a prodotti in gres porcellanato ad impasto colorato, si misura il volume rimosso in particolari condizioni di abrasione. Una piastrella è tanto piu resistente quanto minore è il volume di materiale rimosso. I requisiti obbligatori in termini di massimo volume di materiale rimosso è ≤ 175 mm³

With reference to porcelain stoneware products with coloured body, the volume removed in special abrasion conditions is measured. The more resistant the tile, the lower the volume of removed material. The mandatory requirement as for max. volume of removed material is ≤ 175 mm³

Pour les produits en grès cérame à pâte colorée, il s’agit de mesurer le volume de matériau éliminé en conditions d’abrasion particulières. Plus un carreau est résistant, plus son volume de matériau éliminé est faible. La valeur maximum obligatoire de matériau éliminé doit être ≤ 175 mm³

Bei den Feinsteinzeugprodukten mit farbiger Masse wird der abgetragene Betrag unter besonderen Abriebbedingungen gemessen. Je weniger Material abgetragen wird, umso höher ist die Abriebfestigkeit der Fliese. Die Vorgaben in Bezug auf die maximal abgetragene Materialmenge sind ≤175 mm³

UNI EN ISO 10545.7

RICERCA PEI: classificazione pei di prodotti in gres porcellanato smaltato per destinazione d’uso
PEI RESEARCH: PEI classification of products in glazed porcelain stoneware according to intended use
RECHERCHE PEI: classe PEI des produits en grès cérame émaillé selon le critère d’usage
PEI STUDIE: PEI Klassifizierung der glasierten Feinsteinzeugprodukte nach Anwendungszweck

PEI I	Prodotti destinati ad ambienti sottoposti a traffico leggero e senza sporco abrasivo; es. bagni, camere da letto. <p>Products for use in low traffic areas and without abrasive dirt; e.g. bathrooms, bedrooms.</p> Produits destinés à des environnements soumis à un trafic léger et dépourvus de saletés abrasives; par exemple salles de bains et chambres à coucher. Produkte für Räume mit einer geringen Begehung und damit einhergehend wenig Abriebschmutz; Bsp. Bäder, Schlafzimmer.
PEI II	Prodotti destinati ad ambienti sottoposti a traffico medio e ad azione abrasiva medio-bassa; es. studi, soggiorni. <p>Products for use in medium traffic areas and medium-low abrasive dirt; e.g. studies, lounge rooms.</p> Produits destinés à des environnements soumis à un trafic moyen à action abrasive moyenne - faible; par exemple bureaux et salons. Produkte für Räume mit einer mittelstarken Begehung und einer damit einhergehenden mittel-niedrigen Abriebwirkung; Bsp. Arbeitszimmer, Wohnzimmer.
PEI III	Prodotti destinati ad ambienti sottoposti a traffico medio forte con azione abrasiva medio; es. ingressi, cucine di case private. <p>Products for use in medium to high traffic areas with medium abrasive dirt; e.g. entrances, kitchens of private residences.</p> Produits destinés à des environnements soumis à un trafic moyen - intense à action abrasive moyenne; par exemple entrées et cuisines domestiques. Produkte für Räume mit einer mittelstarken Begehung und damit einhergehend einer durchschnittlichen Abriebwirkung; Bsp. Eingänge, Küchen in Privatwohnungen.
PEI IV	Prodotti destinati ad ambienti sottoposti a traffico intenso; es. ristoranti, uffici, negozi. <p>Products for use in high traffic areas; restaurants, offices, shops.</p> Produits destinés à des environnements soumis à un trafic intense; par exemple restaurants, bureaux et magasins. Produkte für Räume mit einer starken Begehung; Bsp. Restaurants, Büros, Geschäfte.
PEI V	Prodotti destinati ad ambienti sottoposti a traffico particolarmente intenso. <p>Products for use in areas with particularly high traffic.</p> Produits destinés à des environnements soumis à un trafic très intense. Produkte für Räume mit einer extrem starken Begehung.

DIN 51130 ANTISCIVOLOSITÀ R

Normativa tedesca che misura le determinazione della resistenza allo scivolamento per pavimentazioni di ambienti di lavoro e zone operative con superfici sdrucciolevoli Il metodo adottato è il calpestio su un piano ad inclinazione variabile. La classificazione per le caratteristiche antidrucciolo prevede 5 gruppi: R9-R10-R11-R12-R13

R ANTI-SLIP = German norm measuring the determination of anti-slip resistance for working and operating place floors with slippery surfaces. The used method is trampling on a plane with variable sloping. The classification of the anti-slip characteristics includes 5 groups: R9-R10-R11-R12-R13

ANTIDÉRAPAGE R = norme allemande qui détermine la résistance au dérapage des carrelages destinés aux lieux de travail et zones où des surfaces antidérapantes sont requises. La méthode de mesure adoptée est le piétinement de surface selon différentes pentes. La classe antidérapage se divise en 5 groupes : R9, R10, R11, R12 et R13

RUTSCHFESTIGKEIT R = Deutsche Norm zur Messung der Rutschfestigkeit von Fußböden in Arbeitsräumen und -bereichen mit rutschigen Oberflächen. Die vorgesehene Methode beinhaltet das Gehen auf einer schiefen Ebene mit mehr oder minder großem Neigungswinkel. Im Hinblick auf die rutschhemmenden Eigenschaften wird nach 5 Bewertungsgruppen unterschieden: R9-R10-R11-R12-R13

TEST ANTISCIVOLOSITÀ DCOF (DYNAMIC COEFFICIENT OF FRICTION)

Metodo di prova valido per gli Stati Uniti (ANSI A137.1: 2012). Misura il coefficiente di attrito dinamico su pavimenti con superficie bagnata. Per superare il test, la superficie deve avere un coefficiente superiore a 0,42.

DCOF (Dynamic Coefficient of Friction) anti-slip test. Test method valid in the United States (ANSI A137.1: 2012). Measures dynamic friction coefficient on wet floors. To pass the test, the surface must have a coefficient of more than 0.42.

Test antiglisse DCOF (Dynamic Coefficient of Friction – Coefficient de Frottement Dynamique). Méthode de test valable pour les Etats-Unis (ANSI A137.1: 2012). Elle mesure le coefficient de frottement dynamique sur des sols dont la surface est mouillée. Pour que le test soit concluant, la surface doit avoir un coefficient supérieur à 0,42.

Rutschsicherheitstest DCOF (Dynamic Coefficient of Friction) (dynamischer Reibungskoeffizient) Für die USA gültige Testmethode (ANSI A137.1: 2012). Misst den dynamischen Reibungskoeffizienten aus Fußboden mit nasser Oberfläche. Um den Test zu bestehen, muss die Oberfläche einen Koeffizienten über 0,42 aufweisen.

DIN 51097 A - B - C

Norma tedesca che prevede la determinazione delle proprietà anti-scivolo in zone bagnate.il metodo adottato è il camminamento a piedi nudi su un piano ad inclinazione variabile dove viene fatta scorrere dell’acqua. La classificazione per le caratteristiche antidrucciolo su bagnato prevede 3 gruppi: A – B (A+B) – C (A+B+C)

German norm regarding the determination of the anti-slip characteristics in wet areas. The used method is trampling on a plane with variable sloping. The classification of the anti-slip characteristics on wet surface includes 3 groups: A – B – C

Norme allemande qui définit les propriétés antidérapantes des surfaces humides. La méthode de mesure se base sur le piétinement à pieds nus d’une surface où ruisselle de l’eau, selon différentes pentes. La classe antidérapage des surfaces humides se divise en 3 groupes : A, B et C

Deutsche Norm zur Messung der Rutschfestigkeit in Nassbereichen. Die vorgesehene Methode beinhaltet das Barfußgehen auf einer schiefen Ebene mit mehr oder minder großem Neigungswinkel, auf der Wasser als Gleitmittel verwendet wird. Im Hinblick auf die rutschhemmenden Eigenschaften in Barfußbereichen wird nach 3 Bewertungsgruppen unterschieden: A – B – C≤175 mm³

ASTM C 1028

Normativa valida per gli U.S.A. che prevede la misura del coefficiente di attrito statico sia in condizioni di superficie asciutta che bagnata utilizzando un dispositivo scivolante rivestito di neolite su cui agisce un carico di 50 libbre. Gli indici di coefficiente di attrito statico sono i seguenti:

Norm valid for the U.S.A. including the measurement of the static friction coefficient in dry and wet surface conditions using a neolite-coated sliding device on which a 50-pound load is applied. The indexes of the static friction coefficient are the following:

Norme de référence des États-Unis qui définit le coefficient de friction statique sur des surfaces sèches ou humides, en utilisant un dispositif glissant revêtu de néolite sur lequel agit une charge de 50 livres. Les indices du coefficient de friction statique sont les suivants:

US-Norm zur Messung des statischen Reibungskoeffizienten auf trockener sowie nasser Oberfläche anhand einer gleitenden, neolitbeschichteten und mit 50 Pfund beschwerten Vorrichtung. Die statischen Reibbeiwerte sind:

≤ 0,50	Attrito contestabile <p>Dubious slip resistance</p> Coefficient de friction contestable Beanstandbare Reibung
0,50 ÷ 0,60	Attrito non anti-scivolo <p>Ineffective slip resistance</p> Coefficient de friction non antidérapant Keine Antirutsch-Reibung
≥ 0,60	Attrito anti-scivolo <p>Slip resistant</p> Coefficient de friction antidérapant Antirutsch-Reibung

BCR TORTUS

Metodo di derivazione inglese che misura il coefficiente di attrito dinamico. Tale coefficiente di attrito è misurato determinando l’attrito dinamico tra il campione ed un elemento scivolante in movimento a velocità costante sulla superficie delle piastrelle in condizioni asciutte e bagnate. Gli indici di coefficiente di attrito sono:

Method of English origin measuring the dynamic friction coefficient. Such friction coefficient is measured determining the dynamic friction between the sample and the sliding element moving at a steady speed on the surface of tiles in dry and wet conditions. Friction coefficient indexes are:

Méthode d’origine anglaise mesurant le coefficient de friction dynamique. Ce coefficient de friction est calculé en mesurant la friction dynamique entre l’échantillon et un élément glissant mù à vitesse constante sur une surface carrelée sèche et humide. Les indices du coefficient de friction sont:

Englische Methode zur Messung des dynamischen Reibungskoeffizienten. Der Reibungskoeffizient wird durch Bewertung der dynamischen Reibung zwischen Prüfling und mit gleichförmiger Geschwindigkeit auf der trockenen sowie nassen Oberfläche gleitendem Element gemessen. Die Reibbeiwerte sind:

μ < 20	Scivolosità pericolosa <p>Dangerously slippery</p> Glissant dangereux Gefährliche Glätte
0,20 < μ > 0,40	Scivolosità eccessiva <p>Excessively slippery</p> Glissant excessif Übertriebene Glätte
0,40 < μ > 0,74	Attrito soddisfacente <p>Acceptable slip resistance</p> Coefficient de friction satisfaisant Zufriedenstellende Reibung
μ > 0,74	Attrito eccellente <p>Excellent slip resistance</p> Coefficient de friction excellent Hervorragende Reibung

N.B.: classificazione per l’idoneità al superamento e all’eliminazione delle barriere architettoniche (D.M.del 14/06/1989 n.236 della Repubblica Italiana) il coefficiente deve essere > 0,40
N.B.: classification of suitability to pass and remove architectural barriers (M.D. 14/06/1989 no. 236 of the Italian Republic); the coefficient must be > 0.40
N.B.: classe d’accessibilité et élimination des barrières architecturales (D.M. du 14/06/1989 n° 236 de la République Italienne). Le coefficient doit être > 0,40
N.B.: Klassifizierung nach Eignung für barrierefreie Architektur (Ministerialdekret vom 14.06.1989 Nr. 236 der italienischen Republik) der Koeffizient muss > 0,40 sein

- **Certificazione QB UPEC ottenuta anche per gli articoli a spessore 9,5 mm.**
- QB UPEC certification also obtained for 9.5 mm-thick items.
- Certification QB UPEC aussi pour les articles de 9,5 mm d'épaisseur.
- Das QB UPEC-Siegel wurde auch für die Produkte in der Materialstärke 9,5 mm erlangt.

In base alla Direttiva Europea per i prodotti da costruzione 89/106 è obbligatorio, per la libera circolazione dei prodotti nei paesi dell'Unione Europea, apporre la marcatura CE su tutte le confezioni di piastrelle in ceramica. La presenza sull'imballo della marcatura CE è la garanzia che il produttore ha ottemperato alle disposizioni previste e che il prodotto acquistato possiede (per tutti i lotti di produzione) i requisiti richiesti dalle normative vigenti.

Per ulteriori informazioni, approfondimenti e download delle marcature CE: www.castelvetro.it

According to the European Directive for building products 89/106, the CE mark must be applied on all packages of ceramic tiles for the free circulation of products in the European Union countries. The CE mark on the package ensures the manufacturer has complied with the mandatory provisions and that the purchased product meets the requirements by the norms in force (for all production lots). For further information, data and download of CE marks: www.castelvetro.it

La Directive européenne des produits de construction 89/106 rend le label CE obligatoire sur tous les emballages de carreaux de céramique, en vue de la libre circulation des produits à l'intérieur de l'Union Européenne. La présence du label CE sur l'emballage garantit le respect, par le producteur, des dispositions en vigueur et garantit que son produit a (pour tous les lots de sa production) toutes les caractéristiques requises en la matière. Pour de plus amples informations, des approfondissements et le téléchargement des labels CE, voir : www.castelvetro.it

Nach der Europäischen Richtlinie 89/106 über Bauprodukte müssen zum freien Warenverkehr innerhalb der Europäischen Gemeinschaft sämtliche Verpackungen keramischer Fliesen mit dem CE-Zeichen versehen werden. Die CE-Kennzeichnung der Verpackung garantiert, dass der Hersteller sämtliche Bestimmungen erfüllt hat und das Produkt (u.z. alle Produktlose) den Forderungen der geltenden Normen entspricht. Für weiterführende Informationen und den Download der CE-Kennzeichnungen: www.castelvetro.it

OUTFIT 2.0

Upec è il marchio di qualità rilasciato dall'istituto francese CSTB che certifica i parametri qualitativi e le idoneità tecniche dei prodotti rispetto a specifiche destinazione d'uso. Secondo la norma NF EN 14411

Upec is the quality mark issued by the French CSTB institute, which certifies products' quality parameters and their technical suitability for specific intended uses. Under the EN 14411 standard

UPEC est la marque de qualité délivrée par l'institut français CSTB, qui certifie les paramètres de qualité et l'adéquation technique des produits par rapport à une destination d'usage spécifique. Selon la norme EN 14411

Upec ist ein vom französischen Institut CSTB ausgestelltes Qualitätszeichen, das die qualitativen Parameter und die technische Eignung von Produkten für ihre jeweiligen Zweckbestimmungen zertifiziert. Nach Norm EN 14411

SASO è un marchio di qualità per l'Arabia Saudita. Il marchio approvato dall'organizzazione per standard dell'Arabia Saudita indica la conformità di un prodotto agli standard del paese secondo la norma UNI EN 14411:2016.

SASO is a quality mark for Saudi Arabia. The mark, approved by the Saudi Arabian Standards Organization, confirms a product's compliance with the country's standards, in accordance with EN 14411:2016.

SASO est une marque de qualité pour l'Arabie saoudite. La marque approuvée par l'Organisation saoudienne de normalisation indique la conformité d'un produit aux normes du pays selon la norme EN 14411:2016.

SASO ist ein Qualitätszeichen für Saudi-Arabien. Das von der saudi-arabischen Normungsorganisation zugelassene Zeichen bescheinigt die Konformität eines Produkts mit den Standards des Landes nach Norm EN 14411:2016.

Il marchio Ceramics of Italy è il simbolo del "Made in Italy". Racchiude in sé valori riconosciuti in tutto il mondo che vanno dalla qualità alla trasparenza, dalla leadership nel design all'innovazione, alla sostenibilità ambientale. Marchio settoriale di denominazione di origine dei prodotti ceramici.

The Ceramics of Italy mark is the symbol of "Made in Italy" ceramic products. It embodies globally recognised values ranging from quality to transparency and from design leadership to innovation and environmental sustainability. Industry-specific designation of origin brand for ceramic products.

La marque Ceramics of Italy est le symbole du « Made in Italy ». Elle reflète des valeurs reconnues dans le monde entier, allant de la qualité à la transparence, en passant par le leadership en matière de design jusqu'à l'innovation et la durabilité environnementale. Marque sectorielle pour l'appellation d'origine des produits céramiques.

Das Zeichen Ceramics of Italy ist das Symbol für „Made in Italy“. Es steht für weltweit anerkannte Werte, wie Qualität, Transparenz, Designleadership, Innovation und ökologische Nachhaltigkeit. Branchenspezifisches Zeichen für die Herkunftsbezeichnung keramischer Produkte.

Castelvetro è una realtà innovativa non solo per la qualità dei prodotti ma soprattutto per il suo impegno in una crescita economica sostenibile e nella salvaguardia dell'ambiente, garantito anche dalle certificazioni ottenute. Castelvetro in un perfetto connubio fra innovazione e tradizione, materiali naturali e tecnologie all'avanguardia, gestione delle materie prime utilizzate e coinvolgimento attivo e consapevole delle risorse umane interne, è riuscita a rinnovare le tecniche, plasmare i materiali e ottimizzare i servizi in modo da non danneggiare la nostra salute e la salubrità dell'aria degli ambienti in cui viviamo, secondo un principio di azienda, ricerca e design caratterizzati da una profonda valenza etica e sociale.

Castelvetro is an innovative reality not only for the quality of its products but above all for its engagement in a sustainable economic growth and in the environment protection, as ensured by the obtained certifications. Castelvetro perfectly matches innovation and tradition, natural materials and vanguard technologies, management of the used raw materials and active and conscious involvement on internal human resources; the result is a renewal of techniques, the shaping of materials and optimization of services so as to safeguard our health and the air salubrity in the places we live in, according to a concept of company, research and design featured by deep ethical and social values.

Ceramiche Castelvetro est une entreprise innovante, non seulement pour la qualité de ses produits, mais également pour son engagement en faveur d'une croissance économique durable dans le respect de l'environnement et garantie par les certifications obtenues. Ceramiche Castelvetro a réussi, grâce à un équilibre parfait entre innovation, tradition, matériaux naturels, technologies d'avant-garde, gestion des matières premières utilisées et participation active et consciente des ressources humaines internes à révolutionner les techniques, à donner forme aux matériaux et à optimiser les services tout en préservant notre santé et la qualité de l'air que nous respirons, en suivant la ligne directrice de la recherche et du design selon des valeurs éthiques et sociales.

Castelvetro ist ein innovatives Unternehmen im Hinblick auf Produktqualität und vor allem auf das Engagement in nachhaltiges Wirtschaftswachstum sowie Umweltschutz, was durch die erhaltenen Zertifizierungen eindeutig garantiert wird. Im perfekten Einklang zwischen Innovation und Tradition, Naturwerkstoffen und moderner Technologie sowie zwischen Rohstoffwirtschaft und aktiver Personalbeteiligung ist es Castelvetro gelungen, durch innovative Techniken die Werkstoffe und Serviceleistungen zu optimieren und somit weder unsere noch die Gesundheit unserer Wohnräume zu gefährden. Die hierbei angewandten Unternehmens-, Forschungs- und Designmaßstäbe zeichnen sich durch tiefgreifende ethische wie soziale Wertigkeit aus.

SVILUPPO ECOSOSTENIBILE .
ECO-SUSTAINABLE DEVELOPMENT . DÉVELOPPEMENT DURABLE . NACHHALTIGE ENTWICKLUNG

CIRCUITO DI RICICLO

Il termine del ciclo di vita di un prodotto si ha con la demolizione delle piastrelature. I detriti provenienti dalla demolizione delle piastrelature sono rottami di materiali ceramici, dunque di materiali “inerti” (non reattivi, chimicamente e fisicamente stabili, resistenti ad esposizione prolungata anche a condizioni estreme dal punto di vista termico, igrometrico e chimico). I detriti di demolizione di piastrelature possono essere collocati nell'ambiente senza rischi particolari, ed anche trovare impiego nella preparazione di sottofondi, etc.

RECYCLING CIRCUIT

The end of a ceramic product life cycle comes with demolition of the tiles. Tile demolition rubble consists of ceramic scrap, “inert” matter (non-reactive, chemically and physically stable, resistant to prolonged exposure even at extreme thermal, hygrometric and chemical conditions). Tile demolition waste can be placed in the environment with no specific risks, and can be used in the preparation of roadbeds, etc.

CIRCUIT DE RECYCLAGE

La fin du cycle de vie d'un produit correspond à la démolition des carrelages. Les débris provenant de la démolition des carrelages sont des déchets de matériaux céramiques, et par conséquent de matières “inertes” (non réactives, chimiquement et physiquement stables, résistantes à une exposition prolongée même à des conditions thermiques, hygrométriques et chimiques extrêmes). Les déchets de démolition de carrelage peuvent se retrouver dans l'environnement sans en affecter particulièrement la qualité. Ils peuvent aussi être utilisés pour réaliser de sous-couches, etc..

RECYCLING-KREISLAUF

Der Lebenszyklus des Produkts endet mit dem Abriss der Fliesen. Bei dem beim Abriss der Fliesen entstehenden Schutt handelt es sich um Keramikmaterial, d.h. um inerte Materialien (reaktionsträge, chemisch und physikalisch stabil, die gegenüber einer längeren Exposition auch bei thermisch, hygrometrisch und chemisch extremen Bedingungen beständig sind). Der beim Abriss der Fliesen entstehende Schutt ist mit keinen besonderen Gefahren für die Umwelt verbunden und kann auch zur Vorbereitung von Untergründen dienen.

RIUTILIZZO DEL 100% DEGLI SCARTI CRUDI

Il 100% degli scarti crudi derivanti dal ciclo di produzione vengono riutilizzati nella fase di preparazione dell'impasto, contribuendo in modo sensibile alla salvaguardia delle risorse naturali riducendo l'estrazione di materie prime da cava.

REUSE OF 100% OF GREENWARE WASTE

100% of greenware waste from the production cycle is reused in tile body preparation, making a significant contribution to the conservation of natural resources by reducing the quarrying of raw materials.

RÉUTILISATION À 100 % DES DÉCHETS CRUS

100% des déchets crus issus du cycle de production sont réutilisés dans la phase de préparation de la pâte, contribuant ainsi de manière sensible à la préservation des ressources naturelles en réduisant l'extraction de matières premières dans les carrières.

WIEDERVERWENDUNG VON 100 % DER UNGEBRANNTEN PRODUKTIONSABFÄLLE

100% der ungebrannten Produktionsabfälle werden in der Masseaufbereitung recycelt, was einen spürbaren Beitrag zum Schutz der natürlichen Ressourcen durch die Reduzierung des Rohstoffabbaus bedeutet.

RIUTILIZZO/RICICLO DEL 100% DEGLI SCARTI COTTI

Gli scarti cotti sono completamente riutilizzati nel ciclo produttivo. Inoltre, a fine vita, le piastrelle CERAMICHE CASTELVETRO possono essere riciclate come inerti per sottofondi di strade ed edifici, riducendo così l'uso di ghiaia ed inerti naturali comunemente utilizzati in edilizia.

REUSE/RECYCLING OF 100% OF FIRED WASTE

All fired waste is reused in the production cycle. Moreover, at end-of-life CERAMICHE CASTELVETRO tiles can be recycled as hard core for the foundations of roads and buildings, thus reducing the use of natural aggregates and gravel normally used in construction.

RÉUTILISATION/RECYCLAGE À 100 % DES DÉCHETS CUITS

Les déchets cuits sont entièrement réutilisés dans le cycle de production. Par ailleurs, en fin de vie, les carreaux CERAMICHE CASTELVETRO peuvent être recyclés en tant que matériaux inertes pour les sous-couches des routes et des bâtiments, ce qui réduit l'utilisation de graviers et de matériaux inertes naturels couramment utilisés dans la construction.

WIEDERVERWENDUNG/RECYCLING VON 100 % DER GEBRANNTEN PRODUKTIONSABFÄLLE

Gebrannte Produktionsabfälle wird vollständig im Produktionszyklus wiederverwendet. Fliesen von CERAMICHE CASTELVETRO können am Lebensende auch als inertes Schüttmaterial für Untergründe im Straßen- und Gebäudebau recycelt werden. Auf diese Weise reduziert sich der Einsatz von Schotter und natürlichen inerten Materialien im Bauwesen.

RICICLO DEL 100% DEI RIFIUTI NON CERAMICI

Il 100% dei rifiuti non ceramici derivanti dalle attività produttive è gestito in modo differenziato e riciclato in altri processi produttivi.

RECYCLING OF 100% OF NON-CERAMIC WASTE

100% of non-ceramic waste from production operations is sorted by type and recycled for use in other production processes.

RECYCLAGE À 100 % DES DÉCHETS NON CÉRAMIQUES

100% des déchets non céramiques issus des activités de production sont traités séparément et recyclés dans d'autres processus de production.

RECYCLING VON 100 % DER NICHTKERAMISCHEN ABFÄLLE

Nichtkeramische aus der Produktion stammende Abfälle werden getrennt und zu 100% in anderen Produktionsprozessen recycelt.

RIUTILIZZO DEL 100% DELLE ACQUE DI PROCESSO

La produzione di piastrelle di ceramica richiede ingenti quantitativi di acqua. Per salvaguardare questa importante risorsa naturale CERAMICHE CASTELVETRO riutilizza il 100% delle acque reflue derivanti dal ciclo di produzione, generando una riduzione fino all'80% del fabbisogno idrico degli stabilimenti.

REUSE OF 100% OF PROCESS WASTEWATER

Ceramic tile production requires huge amounts of water. To conserve this important natural resource, CERAMICHE CASTELVETRO reuses 100% of the wastewater from the production cycle, generating a reduction of up to 80% in the plant's water consumption.

RÉUTILISATION À 100 % DES EAUX INDUSTRIELLES

La production de carreaux de céramique nécessite de très grandes quantités d'eau. Afin de préserver cette importante ressource naturelle, CERAMICHE CASTELVETRO réutilise 100% des eaux usées provenant du cycle de production, ce qui permet de réduire jusqu'à 80% les besoins en eau des usines.

WIEDERVERWENDUNG VON 100 % DER PROZESSWASSER

Die Produktion von Keramikfliesen erfordert hohe Wassermengen. Zum Schutz dieser natürlichen Ressource erfolgt bei CERAMICHE CASTELVETRO die vollständige Wiederverwendung des Abwassers aus dem Produktionszyklus, wodurch der Wasserbedarf des Werks um bis zu 80% reduziert wird.

BASSE EMISSIONI IN ATMOSFERA

Gli importanti investimenti attuati nelle migliori tecnologie a disposizione permettono di realizzare i prodotti CERAMICHE CASTELVETRO riducendo al minimo le emissioni gassose in atmosfera, raggiungendo livelli 10 volte inferiori ai severi limiti ambientali richiesti dalla legislazione italiana.

LOW ATMOSPHERIC EMISSIONS

Major investments in the best technologies available enable the manufacture of CERAMICHE CASTELVETRO products with minimal gaseous emissions into the atmosphere, achieving levels 10 times lower than the strict environmental limits required by Italian legislation.

FAIBLES ÉMISSIONS DANS L'ATMOSPHÈRE

Les importants investissements réalisés dans les meilleures technologies disponibles permettent de fabriquer les produits CERAMICHE CASTELVETRO avec des émissions de gaz dans l'atmosphère réduites à des niveaux très bas, dix fois inférieurs aux strictes limites environnementales requises par la législation italienne.

GERINGE EMISSIONSABGABE AN DIE LUFT

Wichtige Investitionen in die besten verfügbaren Technologien ermöglichten es CERAMICHE CASTELVETRO, die Emission der bei der Produktion entstehenden Abgase an die Luft auf ein Mindestniveau zu reduzieren, das 10 mal niedrigerer als die strengen Emissionsgrenzwerte der italienischen Umweltgesetzgebung ist.

FORTE RIDUZIONE DEI CONSUMI ENERGETICI

L'uso di tecnologie all'avanguardia e di soluzioni impiantistiche ottimali riducono sensibilmente l'uso di gas metano nel processo produttivo.

LARGE REDUCTION IN ENERGY USE

The use of state-of-the-art technologies and optimal engineering solutions significantly reduces the amount of natural gas used in the production process.

FORTE RÉDUCTION DES CONSOMMATIONS D'ÉNERGIE

L'utilisation de technologies de pointe et de solutions optimales dans les usines réduit considérablement l'utilisation de gaz méthane dans le processus de production.

STARKE REDUZIERUNG DES ENERGIVERBRAUCHS

Moderne Technologien und optimale Anlagenlösungen ermöglichen einen erheblich geringeren Einsatz von Methangas im Produktionsprozess.

UTILIZZO DI IMBALLAGGI 100% RICICLABILI

I materiali impiegati per gli imballaggi dei prodotti CERAMICHE CASTELVETRO (quali scatole, cartone, plastica, palette in legno, etc.) sono completamente riciclabili.

USE OF 100% RECYCLABLE PACKAGING

The materials used for the packaging of CERAMICHE CASTELVETRO products (such as boxes, cardboard, plastic, wooden pallets, etc.) are completely recyclable.

UTILISATION D'EMBALLAGES 100 % RECYCLABLES

Les matériaux utilisés pour l'emballage des produits CERAMICHE CASTELVETRO (boîtes, carton, plastique, palettes en bois, etc.) sont entièrement recyclables.

VERWENDUNG VON 100 % RECYCELBAREN VERPACKUNGEN

Die für die Verpackungen der Produkte von CERAMICHE CASTELVETRO verwendeten Materialien (Schachteln, Pappe, Kunststoff, Holzpaletten, usw.) sind vollständig recycelbar.

PALLET FAO

CERAMICHE CASTELVETRO utilizza pallet senza corteccia conformi allo standard IPPC / FAO ISPM 15, offrendo quindi ai Paesi importatori ogni garanzia per la salvaguardia del proprio patrimonio forestale.

FAO PALLETS

CERAMICHE CASTELVETRO uses bark-free pallets compliant with the IPPC / FAO ISPM 15 standard, and thus provides importer countries with full guarantees for the protection of their forests.

PALETTES FAO

CERAMICHE CASTELVETRO utilise des palettes sans écorce conformément à la norme CIPV / FAO NIMP 15, offrant ainsi aux pays importateurs toutes les garanties pour la préservation de leur patrimoine forestier.

FAO PALETTE

CERAMICHE CASTELVETRO verwendet Paletten aus entrindetem Holz gemäß IPPC Standard ISPM Nr. 15 der FAO und bietet somit Importländern eine Garantie für den Schutz der Waldbestände.
